

ALL-IN-ONE, ADVANCED NETWORK MANAGEMENT

VeriFone's IntelliView is the next generation network management system that provides all the tools needed to keep POS networks running smoothly. This Linux based enterprise level system delivers flexibility and scalability with an enhanced GUI-based system for simplistic operation. Designed with future proof features for investment protection, IntelliView can be easily accessed from standard Web browsers.

INTELLIVIEW

Comprehensive Tools And Features

- Unique architecture provides a comprehensive set of activities including configuration, statistics, alarm and event reporting, remote downloads and chassis management
- Automatic backup and recovery features
- Advanced tools are available for extended set of tracing and diagnostic routines
- Immediately receive alerts through Email and SMS

Easy, Flexible, Scalable

- Simple, GUI-based management interface provides detailed network information in real time
- Simple installation for easy configuration and monitoring
- Visual representation of network configuration
- Designed for use with VeriFone's IntelliNAC™ network access controller
- Support for all standard Web browsers for remote and local access
- Allows users to start small and expand their framework as new business requirements develop
- Protects investments now and in the future

Security Is Paramount

- Designed to reduce PCI-DSS scope for assessments
- With VeriFone's IntelliNAC, advanced security functions will verify and authenticate the IntelliNAC hardware and software owned by the customer
- Supports remote loading of self-signed customer certificates for multiple security zone operation
- Supports unified logging of legacy and next generation alarms by immediately receiving any alerts through Email or SMS

CPU
Dual Core 2Ghz

Memory
Minimum 4GB RAM,
8GB RAM recommended

Disk
Minimum 250GB (dependent on
network size)

Operating System
Centos Server and Red Hat Enterprise

Browser
Microsoft Internet Explorer 8.0 or higher
Google Chrome R11 or higher
Apple Safari 4.0 or higher
Mozilla Firefox 3.6 or higher

CD-ROM
For installation

Display
1024 x 768 equipped display
(or equivalent)

Pointer Device
Mouse or compatible pointing device

Communications
10/100 Ethernet LAN adapter configured
for TCP/IP support
